Continuous Data Tracking

Core KPI Executive Scorecard

Direct metrics snapshot sourced from our central Power BI Data Lake

**Metrics tracking shows complete stability across all standard target margins. Customer Retention matches optimal target ceiling threshold limits.*

Customer Retention & Churn Dynamics

- ✓ **Stable Target Base:** Current Churn Rate sits at a stable 4.5%.
- 🎯 **Industry Threshold:** Safely operating below our target ceiling threshold of 5.0%.
- ↘️ **Declining Pattern:** Drop in churn rate recorded since mid-2022, verifying strong loyalty impact.

CHURN RATE TREND OVER TIME (2021 - 2023)

Marketing Efficiency & Campaign ROI

MARKETING BUDGET VS CAMPAIGN RETURNS

-  **Calculated Net ROI:** Outperforming with an exceptional net index rate of **330%**.
-  **Spend Allocation:** Cumulative spend budget profile managed effectively at **₹8.2 Cr**.
-  **Total Yield:** Attributed operational business return of **₹32.8 Cr** recorded.

Customer Unit Economics (LTV vs CAC)

Unit economics analysis compares the average lifetime value against customer acquisition spend parameters.

Customer Lifetime Value
(LTV)

₹10,708

Customer Acquisition Cost
(CAC)

₹2,847

LTV to CAC Safety Index

3.76x

Outperforming Industry Standard Benchmark (3.0x) by +25%

Tactical Action Plan & Key Focus

Short Term (1-3 Months)

- ▶ Launch systematic exit surveys and customer feedback circles to identify churn causes.
- ▶ Push 15% promotional budget leverage target during typical high-ROI Q4 holiday seasonal peak.

Long Term (6-12 Months)

- ▶ Scale active customer development operations into Central & West territories to capture lower average CAC levels.
- ▶ Build standard customer loyalty rewards platform with standard tiers targeting average LTV of ₹12,000+.

Presentation Review Summary

- ✓ Strong overall financial health with progressive ₹82.7 Cr revenue foundation.
- ✓ Consistent positive quarterly growth indicators.
- ✓ Balanced customer unit economics proving robust business resilience.

**Health Index: HIGHLY
RESILIENT**

Operations and targets are optimally aligned.
